Artwork specification Neptune Roller Banner

Neptune Rollup Banners are 850mm (W) x 2000mm (H)

Artwork should be supplied at the required output size, always allowing for 200mm deadspace at the base of the design for the banner to feed into the roller mechanism

If it is necessary to change the scale of artwork to better manage file size, please make sure the scale is still proportionate to the required output size and indicate the percentage the artwork is saved at.

Text should be outlined or embedded into the artwork to avoid problems with fonts

Our prefered format for artwork is eps, Adobe Illustrator files or PDFs

200mm Attachment area, this space is not printable it is used to attach the banner to the roller mechanism.
