

Artwork specification

PVC Banner

Artwork as to be supplied at the required output size,
Add 40mm all around if hemming is required.

If eyelets are needed please distribute every
400 - 500mm or as required.

Eyelet marks should be 10mmx10mm

Please ensure you place a dashed line around the edge
of the finished size and another dashed line around the
bleed area as below.

If it is necessary to change the scale of artwork
to better manage file size, please make sure the scale
is still proportionate to the required output size
and indicate the percentage the artwork is saved at.

Text should be outlined to avoid problems with fonts
and all the images embedded into the artwork.

Our preferred format for artwork is eps, pdf, jpg.
